SIMPLY CLEVER

INTRODUCING **A NEW SPECIES** OF **SUV**

RUGGED BEAUTY

Ready to take on the toughest conditions, the ŠKODA KODIAQ radiates majestic power. Its precise, sharp lines are shaped by ŠKODA's new design language for SUVs, making it distinctive, emotional and timeless. Whether judged from the details or as a whole, it's clear that form and function are in perfect harmony. The KODIAQ is a muscular beauty that combines a robust body with impressive off-road capability.

Full LED headlights with AFS

Innovative crystalline design meets innovative technology. The LEDs diodes offer high performance and high energy efficiency. The AFS (Adaptive Frontlight System) adjusts the lighting intensity to specific conditions (e.g. city, motorway or driving in the rain), while the main headlights boast of an eye-catching integrated strip of LED daytime running lights.

LED rear lights

With the distinctive C-shape, which is typical of ŠKODA cars, the vehicle confidently stands out. The rear lights penetrate deep into the fenders, thus also perfectly lighting the car from the side, too.

STAY CONNECTED

The KODIAQ helps you stay connected wherever you are. To be online fully and permanently, means not only having access to entertainment and information, but also possible assistance while on the move. ŠKODA CONNECT is your gateway to a world of unlimited communication possibilities.

SmartLink

With the SmartLink system (ŠKODA Connectivity bundle supporting MirrorLink®, Apple CarPlay and Android Auto) the car's infotainment system enables the driver to safely use the phone while driving. Plus, all installed applications that are certified as safe for vehicles are compatible with MirrorLink®, Apple CarPlay or Android Auto.*

Multimedia holder

There can only be one driver but those in the back can equally enjoy the drive. The multimedia holder enables you to securely fit a tablet to the front seat headrest or the rear armrest. The integrated phone module with fast LTE internet compatibility is available in combination with the Columbus infotainment system.

* Visit our website for usage terms and compatibility information for SmartLink.

Phone box

This practical phone compartment, located in front of the gear stick, creates an amplified signal for your mobile device. At the same time, it wirelessly charges your phone while driving.

ŠKODA CONNECT - Google Street View

Enjoy engaging 360-degree panoramic images and virtual tours of a number of destinations, even before you get there, directly on the main display.

ŠKODA CONNECT - Weather

Get the latest weather report of your current location or destination, with detailed forecasts, including precipitation predictions and warnings.

ŠKODA CONNECT - SOS Button

The KODIAQ's connectivity includes an SOS line. This emergency system is activated by pushing the red button situated above the centre console. In case of a crash, the emergency call is made automatically.

ŠKODA CONNECT - Parking Position

Retrieve the pinpoint location of your car in large parking spaces from anywhere on your mobile phone, with the address, time and date of parking displayed.

PRACTICALLY PERFECT

Life is easier when equipment is practical. The KODIAQ thus comes with features based on your real needs and includes Simply Clever details that are as ingenious as they are intuitive. Other practical elements are designed with you and your family's utmost safety in mind.

Virtual Pedal

How do you open or close the luggage compartment when your hands are full? Just swipe your foot underneath and, hey presto. It will open for you automatically. The virtual pedal enables contact-free access and it's available exclusively with the electrically-controlled 5th door and KESSY (Keyless Entry, Start and exit System).

Electrically foldable towing device

The tow bar has a foldaway knob, controlled via the luggage compartment handle. Thanks to this, you don't need to remove the tow bar after use. The towing capacity of the KODIAQ is an impressive 2.5 t.

Electrically-controlled 5th door

It opens and closes at the mere touch of a button on the remote control or central panel, especially handy during unfavourable weather. You can also adjust the upper door position to suit your needs. There is a button for closing the 5th door directly on the door too.

Automatic transmission and 4x4 drive

Whatever the conditions throw at you, enjoy absolute comfort and fuel efficiency with the automatic 7-speed DSG (Direct Shift Gearbox) and 4x4 drive.

Area-view camera

You will feel much more confident behind the wheel with cameras that sense the space around the entire vehicle. The picture is transmitted in real time to the infotainment display so you can react quicker to whatever comes your way.

Umbrella storage compartments

Ingenious compartments with two original KODIAQ umbrellas are fitted inside both front doors. They are designed to let water drain away from the car, keeping the interior dry.

3-zone Climatronic

With this state-of-the-art air conditioning system, you can set different temperatures for the driver, co-driver and rear passengers. It's also fitted with a humidity sensor, which reduces windscreen misting.

Dynamic Chassis Control

With an adaptive chassis in place, one press of a button is enough to turn the KODIAQ from a comfort carriage to a master of serpentine roads.

The image shows the interior of a car, likely a Volvo, with a focus on the front and rear seats. The seats are upholstered in a dark, possibly black, leather with light-colored stitching. The car's interior is illuminated by a warm, golden light, suggesting a sunset or sunrise. The steering wheel is visible on the right side, featuring the Volvo logo. The dashboard and door panels are also visible, showing a modern and elegant design. The overall atmosphere is one of luxury and comfort.

SPACE TO SHARE

How big is your family? Up to seven people can travel with ease thanks to the version of the KODIAQ model that has an optional third row of seats. The elegant, functional interior inspires confidence and evokes a peaceful ambience. All the better for reconnecting with friends and family on that great outdoor adventure.

FAMILY PROOF

Parents, children, dogs, bears, toys, snacks, plus situations you cannot anticipate - that's par for the course when travelling with the family. And even if yours is wilder than most, the KODIAQ can handle it. The spacious, flexible and rugged KODIAQ is prepared for anything that comes its way.

Sleep Package

Rear passengers will sleep sweetly through a long journey thanks to the Sleep Package. It includes variable headrests of the outer seats for a comfortably supported head posture while sleeping, plus a blanket.

Jumbo Box

The spacious storage compartment is housed in the front armrest. You can store your electronic items safely inside or cool snacks to keep them fresh. A dual drinks holder can also be found on the centre console.

Door edge protection

When opening all side doors, plastic strips eject and cover the edges. The KODIAQ thus protects itself against damage as well as being considerate to other cars. Perfect for tight parking spaces, for instance.

Luggage compartment

A look behind the 5th door will impress because the KODIAQ offers unrivalled boot capacity. With the five-seat interior layout, you have 720 litres of luggage space and 2,065 litres with the rear seats folded. No wonder it's called 'The Great Indoors'.

Two child seats

Your children will ride in the back in absolute comfort and safety. Putting the children into car seats is pleasant business too thanks to the large side doors and lots of space in the rear seats.

Electric child safety lock

Just one push of a button and your children's journey will be even safer. The child safety lock will prevent them from opening the rear windows and doors.

The KODIAQ derives its name from the majestic Kodiak bears who inhabit the namesake island in Alaska. Rugged, robust and masters of terrain, they are the inspiration behind our latest SUV.
